
Land Process Control Recommendation Process
Determine Recommendation Start and End Dates via the Land Process Control Screen
Recommendation Start Date = date value entered into field
Example:
Recommendation Start Date = 1/1/2022
Periods to Process = 12
Recommendation End Date = 1/1/2023
Recommendation End Date = Start date + periods to process
Example: R303
Initiation Date = 6/21/2021
End Date = 6/21/2022
Frequency = 12
Agreement Expiration = 6/21/2022
Review Applicable Payment Obligations
Determine Payment Due Date AND Payment End Date
Payment Due Date = A combination of the Obligation Initiation Date and the obligation frequency
Payment End Date = Whichever comes first between the Agreement Expriaton Date and the Recommendation End Date
Example: R303
Payment Due Date = 6/21/2021
Payment End Date = 6/21/2022
Agreement R303 Is not pulling into Payment Obligations
Reason: Payment Due Date is based on the Initiation Date of 6/1/2021 which preceds the recommendation date of 1/1/2022.
If you need the obligation to generate in June of 2022 then you'll need to add another Payment Obligation row to the grid with an initaiton date of 6/1/2022
Example: R303
Payment Due Date = 6/21/2021
Recommendation Start Date = 1/1/2022
Is the Payment Due Date >= the Recommendation Start Date?
Yes
Is the Payment End Date <= the Recommendation End Date
Yes
Generate Payment Obligation
No
Do Nothing
No
